DETAILED ACTION

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection. Claims 6 and 8 were read, by examiner, as requiring a chelating agent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4,6-8,12,14,15,17,19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al (USPN 5674897; 10/7/97). Kim teaches a composition comprising 10 – 20,000 ppm C8 to C14 fatty acid esters plus a surfactant plus water (nutrient). Kim teaches a method of applying the composition to plants to control nematodes. Kim does not state that invention activates or promotes plant growth. See abstract, column 4 lines 1-63, column 8 lines 58-65, and claims 1-4. However, it is obvious that if the composition is applied to the plant that it would activate plant growth (promote permeation) since active step in the prior art and instant claims is the same, i.e., both disclose a method of applying the composition to plants.

Allowable Subject Matter

Claims 10,16,18,22 are allowable. The prior art provides unexpected results for the instant plant activating agent plus fertilizer.
